

GEN6T® Keying Platform

GEN6T

Description

The Lockwood range of legally protected keying platforms now includes GEN6T, an evolution of Lockwood's proven Generation Six platform. GEN6T uses the patent protected T Pin, giving legal protection to your restricted key system and offering security with the ability to control your keys.

Features and Specifications

- Nickel silver keys for strength
- Economical restricted keying platform for key control
- Lockwood proven design and manufacturing quality
- Colour coded inserts for key identification

Legal Key Control

Key control is fundamental to the security of your building. Legal protection has been afforded to the GEN6T keying platform in the form of patents in a number of countries including Australia and New Zealand.

Serviced Level System

GEN6T Serviced Level Systems are initially assembled by ASSA ABLOY Australia Pty Ltd.

Once the system has been supplied, the system records are available to be transferred to an approved GEN6T Authorised Service Centre.

GEN6T Authorised Service Centres

The use of a GEN6T Authorised Service Centre allows local servicing of your key system for day to day requirements. Each system is registered and signatory control applies to additional key requirements.

Identification of Keys

With a distinctive key head shape, individual keys within a master key system can be easily recognised through the use of colour coded inserts. There are a total of twelve colours to choose from.
