C.Q.R.iT® eXtreme

Hard on the outside, clever on the inside – these cabinets are the strongest on the market. They contain all the great features of the C.Q.R.iT® key cabinets, housed in a heavy-duty exterior.

TAMPER-PROOF CONSTRUCTION
Three-point locking system on the door, internal baffling for cable entry points, welded seams and an internal cover plate to hide the locking mechanisms.

SAME USER RETURN
Enforce this rule on particular keys to make sure that the user who removed the keys is the same one to return them. This adds an extra layer of accuracy to your audit trails.

MULTI-CUSTODY
For particularly sensitive keys, you can make sure that the key only releases if more than one authorized user is present to sign it out.

DUAL AUTHENTICATION
Cabinets require two-points of identification before the door will open, typically Prox and PIN (or User ID and PIN).

SCEC APPROVED
Security Level 3

NIGHT LOCK

CQRiT eXtreme L
Night Lock is C-Class BiLock

SCEC APPROVED
Security Level 4

NIGHT LOCK

CQRiT eXtreme T
Night Lock is B-Class Tumbler

Cabinet can be secured after hours using the Night Lock, which disables the door.
No keys can be accessed, even by authorised users, until the Night Lock is unlocked again.

eXtreme 25

Capacity: 25 keys
Width: 665mm
Cabinet height: 755mm
Stand height: 1000mm
Depth L Series: 215mm
Depth T Series: 267mm
Weight: 70kg

eXtreme 50

Capacity: 50 keys
Width: 880mm
Cabinet height: 755mm
Stand height: 1000mm
Depth L Series: 215mm
Depth T Series: 267mm
Weight: 80kg

eXtreme 100

Capacity: 100 keys
Width: 1050mm
Cabinet height: 1035mm
Stand height: 750mm
Depth L Series: 215mm
Depth T Series: 267mm
Weight: 100kg

Please note: the above dimensions are approximate only. Weight refers to empty cabinet and includes the stand.

COMMUNICATIONS
Each cabinet can communicate to the software using TCP/IP or USB. There is a network port securely inside the cabinet and there is a USB port behind the locked admin panel.

ACCOUNTABILITY
Every transaction at the cabinet (session initiated, door opened, key removed etc) is automatically recorded and stored in the on-board memory.

ALARMS
The cabinet has 2 built in relays (with optional expansion to 8) capable of sending a signal to an external alarm panel based on configurable events.

AUTHENTICATION DEVICES
Any prox reader or biometric device that outputs a Wiegand signal can be added to the cabinet for user authentication.

SPECIFIC RETURN
All keys are removed and returned to the same location, meaning less time spent at the cabinet looking for keys.

Smart solutions for managing keys

CIC TECHNOLOGY

C.Q.R.iT®

Key Cabinets

C.Q.R.iT® key cabinets are the ultimate in security and convenience. Completely automate the process of signing keys in and out. Decide exactly who gets access to what, when and for how long.

AUTHORISATION
The door is secured with a two-point locking system that can only be opened by authorised users.

CONTROL
Each set of keys is individually controlled, allowing you to restrict access based on user, group, time or quantity.

ACCESS
Once the door is unlocked, users can only access the sets of keys they're allowed – all others remain locked in place.
ALARMS
Alarms will always be logged and recorded in the software. They can also be audible at the cabinet, they can send a email and/or relay the signal to an existing alarm panel.

UNIFIED SOLUTION
These cabinets manage your existing keys regardless of type and profile. They can also integrate with your existing readers, access control systems or alarm panels.

REPORTING
Every action or violation at the cabinet is automatically recorded giving you real-time evidence of all transactions and instant access to accurate reports.
PIN

PROX CARD

FINGERPRINT

User: John Smith
Date: 11/10/18 10:34am

5pm

KEY NOT RETURNED

AUTHENTICATION | KEYS RELEASED | ACCOUNTIBILITY | ALARMS

KeySecure® Software

The KeySecure® software is flexible and intuitive. It makes light work of even the most complex access control and monitoring tasks.

ALARMS
Customisable alarms include: door forced, tamper detection, AC power out, key timer expired.

EMAIL ALERTS
Configure automatic emails to give you real-time information of any violations, even if you're offsite.

TIMER
Place timers on certain items and receive notifications if they haven't been returned within that period.

SAME USER RETURN
Ensure that the user who removed a key is the same one to return it, increasing the accuracy of audit trails.

MULTI CUSTODY
For sensitive items, demand that more than one authorised user is present to sign it out.

MAX KEYS OUT
Limit the number of items each user is allowed out of the cabinet at any one time.

TIME ZONES
Restrict the times that users may access certain keys. E.g., Monday to Friday, 9am - 5pm.

ENCRYPTED COMMUNICATION
256-bit AES encryption is used to communicate between the central database and the cabinets.

FLEXIBLE ALLOCATION
Single key positions (bunches) or groups can be allocated to individuals or groups of users.
NETWORK + USB
Fully integrated network capabilities (TCP/IP) as well as a USB port inside the door for full upload / download.

TAMPER-PROOF KEY RINGS®

These high security rings seal permanently into a continuous loop making it impossible to substitute keys without detection. Each key ring is engraved with a unique serial number for maximum accountability.

DIAMETER	CAPACITY (approx)
3cm	1-5 keys
4cm	5-10 keys
5cm	10-15 keys
7cm	15-25 keys
9cm	25-50 keys

FULLY INTEGRATED SOLUTION

GALLAGHER   DAMSTRA   integriti INTEGRATED SOLUTIONS

LENEL   Genetec   SIEMENS

For ultimate convenience, C.Q.R.iT® cabinets can be controlled through a third party system, reducing data entry, improving accuracy and simplifying reporting. In some cases you will even be able to prevent users from exiting the building without returning their keys.

SIZES

C.Q.R.iT 12
Capacity: 12 bunches
Height: 540mm
Width: 665mm
Depth: 170mm
Weight: 12.5kg

C.Q.R.iT 25
Capacity: 25 bunches
Height: 760mm
Width: 705mm
Depth: 170mm
Weight: 25kg

C.Q.R.iT 50
Capacity: 50 bunches
Height: 760mm
Width: 920mm
Depth: 170mm
Weight: 32kg

C.Q.R.iT 100
Capacity: 100 bunches
Height: 1050mm
Width: 1090mm
Depth: 170mm
Weight: 60kg

Please note: the above dimensions represent the total space required on the wall, including access for maintenance and installation. Actual cabinet is smaller and fits within this footprint. Weight refers to empty cabinet.

ACCESSORIES

PROX READERS
C.Q.R.iT® cabinets can integrate with almost any prox reader so users can authenticate by presenting a card.

BREATHALYSERS
Make sure your users are under the legal limit before they can access vehicle or plant keys.

COLOURED KEY TAGS
For easy visual identification, keys can be colour-coded without adding unnecessary bulk to your bunches.

TAMPER PROOF CARD HOLDERS
These allow you secure and manage prox cards by attaching to the holder keys within the cabinet.

FINGERPRINT SCANNERS
To protect against PIN or card sharing, fingerprint scanners can be used to identify users.

FACIAL RECOGNITION
Authentication at the cabinet can also occur with increasingly popular facial recognition technology.

DYNAMITE BUTTON
For use in emergencies, administrators can use this button to release all keys.

KEY SHIELD
This hides the cut of important keys when hanging in the cabinet so they can't be copied.
